Thank you for your interest in the Catalina™ range of Swimspas

Catalina Spas UK Ltd is a family business that was first established in 1997. We continue to be the leaders in providing a stunning range of swimspas and fitness pools to clients throughout the UK. We were one of the founders of BISHTA (British & Irish, Spa & Hot Tub Association) and our swimspas are listed in many buyers' guides, including What Swim Spa? With a wealth of expertise, experience and support we have the finest selection of beautiful swimspas waiting for you.

Swimming is a great form of all-round exercise. It's ideal if you want to be more active and stay healthy, whatever your age or ability. Catalina™ have perfected the art of combining the healing powers of warm water and the variable, directional

flow of powerful river swim jets, to bring you the options of an invigorating and healthy workout, and a luxurious refuge to escape from the trials and stresses of modern life. In this brochure we offer you the extensive Catalina™ swimspa range, we are confident you will find a model that both suits your budget and requirements. Simply choose the location in your garden or home and start to enjoy the experience of your own aqua gym.

"One life, live it! What are you waiting for?"

"Every day more and more people are realising the benefit of owning a Catalina™ Swimspa"

1. Professional - Since 1997 we at Catalina™ have supplied many hundreds of swimspas to clients throughout the UK. Our show centres and in house team of trained experts will offer advice, information and recommendations to help choose the right swimspa for you. Whether it's for personal home use, holiday rental or full commercial, we have the ideal swimspa or pool model for you.

2. Build Quality – With Catalina™ you have the peace of mind in the knowledge that we manufacture our swimspas to the very highest standards of quality and design. We only use components from tried and tested suppliers that include Lucite Acrylics, Balboa™ control systems and Waterways™ pumps, jets and fittings.

3. Lifestyle – Swimspas cater for the whole family, whether your looking for an exciting

new exercise regime, a place to relax and enjoy the sunshine or somewhere to unwind after a long day, your swimspa will introduce you to a whole new world of water-based activities. There is nothing more relaxing after a workout than soaking in the warm therapeutic bubbles of your own hot tub so why not select one of our dual temperature models and spend more time with the family, loved ones or friends. Your exercise pool and hot tub combination will bring real quality time, fun and entertainment for all.

4. Water Quality - All Catalina™ swimspas are fitted with European specification 2 speed filter pumps that provide 100% active filtration with Ozone purification. This is a proven, highly efficient and environmentally friendly method as it reduces the number of pumps needed to achieve water filtration and performance as well as providing a

Why Catalina™?

superior water quality. The filter/boost pump is 2.5hp (1.87kW) which runs on only 1.8 Amps on low speed. It is in effect 2 pumps in one - this has several advantages, which includes a reduced electrical loading and increased efficiency. The Catalina™ filtration system gives 100% filtration in low speed - meaning that 100% of the circulating water is passed through the filters. Depending on the volume of the swimspa the water is filtered on average every 20 minutes. This gives the water an exceptional polish and sparkling clarity.

5. Low Running Costs - At Catalina Spas™ Ltd we only use the best insulation available that conforms to the strict California Energy Commission Standards. The California Energy Commission (CEC) was established in 1975 to reduce energy consumption and save on energy bills. It sets strict standards to ensure all CEC compliant products are energy

efficient. As part of Catalina's commitment to ensure our products have low running costs all of our Swimspas meet these high standards. The Catalina™ insulating process starts with the application of high density foam that is spray applied to the reverse of the spa shell and under the contoured top lip and the plumbing. The foam has a closed cell content of 90% and an insulation K factor of 0.16. This process not only gives the very best insulation values it also adds additional strength to the shell and provides a strong support for pipework. All our swimspas are supplied with a deluxe UL listed safety/ insulation cover.

...Why Settle For Less?

The Catalina™ Difference

6. Built To Last – For nearly 40 years Catalina Spas USA have been producing beautiful hot tubs and swimspas that are built to last. Whether its home is in the Californian heat, the humidity of Central America, the mixture of the Great British climate or the ice and snow of Norway, Catalina swimspas go on and on doing what they were designed to do. Our high build standards, premier components and product performance history allows us to offer an industry best 10 year warranty.

7. If You Need Us We Are Here – Having made the decision to own a swimspa or pool from Catalina™ the experience does not stop on the day of delivery. It is our priority to ensure your swimspa will continue to be an asset to your home and

lifestyle. Either direct or through our show centres you will find all the advice and information you need to keep your swimspa at its best. Chemicals, accessories and parts are all available and simply a phone call or a click away. Your peace of mind is our priority and all our swimspas are supplied with an industry leading warranty. If in the unlikely event your swimspa has a problem one of our industry trained engineers will soon have you back enjoying the leisure experience. For that extra peace of mind we offer an extended warranty service plan, this comprehensive all-inclusive service offers a life time warranty (see terms).

8. Range Of Models – At Catalina™ we offer you an extensive range of Swimspa Trainers, Dual temperature Swimspa and fitness pools

in many sizes from 3.8M to 6.4M and varying depths from 1M to 1.6M, there is no need to compromise on quality to achieve affordability.

9. Bespoke Swimspas and Pools – This department of Catalina™ is where we design and manufacture swimspas for bespoke projects. These include hotels, leisure centres, unique residential and where something extra special is needed. We are proud to include Sunseeker International™ and Horizon Yachts as just a few of our many blue chip clients.

10. Commercial – In addition to our swimspas and pools for residential use we have models ideal for therapy centres, rehabilitation suites, rental holiday homes, cabins and other commercial applications.

Catalina™ For Your Health

Swimming is generally regarded as a great way to help you improve your heart rate and blood flow and can help to maintain a healthy weight. It also helps build muscle and has fat burning benefits. Swimming provides many additional benefits that other forms of exercise do not.

Be Active - A 30-minute session of moderate to vigorous-intensity aerobic activity in your swimspa or pool on one or more days a week will count towards your recommended weekly activity.

Muscle Toning - Swimming is a far more effective way of toning your muscles than most other forms of cardiovascular exercise. When you swim you get the cardio part of your workout while also working on an even body tone. Water helps support your bodyweight so it can serve

as a great way for people with injuries to get a good workout.

Stay Healthy - Regular swimming can reduce the risk of chronic illnesses, such as heart disease, type 2 diabetes and stroke. It can also boost your mood and keep your weight under control. Swimming actually boosts endorphins in the body that increase feelings of wellbeing.

Make Exercise More Fun - The idea of endlessly running around a track or cycling on a stationary bike doesn't appeal to a lot of people. For most people, swimming is a safe and effective form of exercise. Swimming is also a great way for families to have fun together. With a Catalina swimspa or pool you can exercise, have fun and stay fit in your own aqua gym

A Sound Investment - Unlike an installed swimming pool a swimspa from Catalina™ has the advantage of being substantially less expensive to heat, easier to look after and can be used all year even when not enclosed. A traditional swimming pool is expensive to install and can be a liability when selling a home - a swimspa can be either sold as an extra or taken with you!

In short, a swimspa offers an excellent way for you to regain and maintain a healthy body, stay fit and have fun, they are less expensive than a swimming pool to install and a fraction of the cost to run.

The power explained

Throughout this brochure you will see the different swimspa and fitness pool models with the following descriptions

Classic

All classic models come as standard with 2 River Swim Jets and 2 high flow pumps.

Classic XP

All classic XP models come as standard with 2 River Swim Jets and 3 high flow pumps.

Aquadynamic

All aquadynamic models have 4 high flow pumps and 3 River Swim Jets, this unique arrangement was pioneered by Catalina™ and is where the central lower river jet provides extra swim resistance and lift.

Dual Temperature

All Dual temperature models have independent heating and filtration to allow the spa to be maintained at a higher temperature than the pool.

Atlantic Pool

The Atlantic is unique in that it can be supplied as a pool only with integral heating and filtration or with the Classic, Classic XP or Aquadynamic river jet performance upgrades.

Mardi Gras

The Catalina Mardi Gras is the original space saving swim trainer and party Spa. It is an ideal entry level, affordable, garden entertainment centre and aqua gym. It features the Catalina Pro Swim training System which gives you a low-impact, full-body workout that builds muscle, increases endurance and burns calories. This swim trainer provides the same workout as swimming in a regular pool without the need to repeatedly turn! The Mardi Gras is perfect for large groups or parties, with LED underwater lighting and seating for 11 people with 28 relaxing hydrotherapy jets. The Mardi Gras is also our shallowest swimspa and because of this it has a low energy requirement and running cost.

Mardi Gras showing PRO Swim pole in use

Mardi Gras

Classie

- 1 x 2.5hp (1.9kW) 2 Speed Pump
- 1 x 3hp (2.2kW) Boost Pump

- 3kW Slave Heater

In-ground available see page 19 for more information

Medley

The Medley is aimed more towards the keen swimmer than the Mardi Gras and Carnival. The length has been increased and the seats in the swim lane removed to widen the swimming area and give more of a traditional pool feel. The spa end has seating for 2 extra people giving a total of 5 seats with massaging hydrotherapy jets. Like the Carnival, the Medley comes with LED illuminated controls and underwater lights, exercise equipment for the ultimate workout and an option of 3 different performance power settings, all of which are available above or in ground.

Made in 

Freestyle

The Freestyle has a large open swim lane that offers an ideal swimming and exercise space. The spa end has seating for 3 which includes 2 deluxe, full body, deep contoured multi jet therapy loungers. It also includes a stand up massage station which together with the seating gives the Freestyle a total of 66 hydrotherapy jets. A heated air blower system makes the jets on a Freestyle swimspa feel more powerful and therapeutic than ever. The Freestyle is available with 2 different performance power settings, the Classic XP and the Aquadynamic, it is also available in above or in ground versions.

We will manufacture to clients specification. No water line tiles were preferred for this indoor installation

*Also available in 3.8M

In-ground available see page 19 for more information

Sprint

The Sprint is a longer version of the Medley. With an extra 600mm in the swim lane and an extra 300 litres water capacity it is the largest of our standard swimspas. Like the Medley it is available in 3 different performance power settings and is available either in ground or above ground. It comes as standard with our Catalina exercise equipment, underwater lights and LED illuminated controls.

Another Catalina installation partly installed into decking. Giving improved access and offers an attractive garden setting.

Made in

Relay Dual Temperature

The Relay is our unique dual temp swimspa with a 'see through' divider. The spa and swimming sections are separated meaning you can have 2 different temperatures set, simultaneously in the same swimspa, a warm relaxing spa end with a cooler more practical swimming end. The spa end has seating for 5 and is separated from the swimming end by a transparent dividing wall. The Relay comes as standard with our Catalina exercise equipment, 8 LED crystal fountains and 2 LED cascade waterfalls, an LED underwater lighting system as well as LED jets and controls. The Relay is available in both above and in ground styles.

A beautiful installation of a Relay inside a purpose built swimspa room.

Inset detail of the Relay's unique, clear divider

Relay Dual Temperature

- 2 x 2.5hp (1.9kW) 2 Speed Pumps
- 3 x 3hp (2.2kW) Boost Pumps
- 2 x 3kW Heaters
- 3 River Swim Jets
- Auxiliary Control Panel
- From 70 Amp Supply (30+40)
- 2 x Ozone
- 2 x 100sq ft Filtration

Optional Upgrades

- Pro Swim
- *Balboa™ Wi-Fi Upgrade
- Auxiliary Heater Controller (installed)
- Titanium LPHW Heat Exchanger, inc AHC (installed)

*On dual temperature models only available on either pool or spa

Marathon

Dual Temperature

The Marathon has all the great features of the Relay and more. The spa end still seats 5 but this time the transparent dividing wall has been replaced on the pool side by 3 extra seats ideal for those warm summer days when you just want to cool down and relax. The total of 8 seats plus 1 stand up massage station makes the Marathon a popular and accommodating dual temperature swimspa. It also features an auxiliary control panel so that you can independently control both ends of the spa at the same time. The Marathon is also available as an in ground swimspa.

An Olympic installed to ground level in this contemporary setting

Made in

Olympic

Dual Temperature

The Olympic is the ultimate dual temperature swimspa. Nothing compares to this wonderful home aqua exercise pool and spa combination. We took our most popular spa model (the Constellation Aquadynamic), added it to our bestselling swimspa and the Olympic was born. Fitted as standard with an unequalled list of features, the Olympic is the arguably the best swimspa available today. With LEDs in everything from the jets to the cup holders, 3 waterfalls, 10 fountains, dual controls, over 100 individual hydrotherapy jets and Bluetooth™ Audio with subwoofer, there is nothing missing from this incredible swimspa.

The ultimate dual temperature swimspa, the Olympic set in raised decking makes an attractive installation with easy access.

Made in

The Amazon is an extended version of the Orinoco. More than a metre longer and with an extra 2500 litres water capacity you can really feel the extra space in an Amazon fitness pool. As with the Orinoco the Amazon is supplied with exercise/ rowing kit. It is available in 3 different performance power settings and as an above or in ground model. Unique to the Amazon Pool is the depth of 1.6 metres. If it's deep you're looking for then look no further than the Amazon.

Crystal Fountains and LED Lighting create stunning night time effects.

Atlantic Pool

The Atlantic is a massive 21 feet long (6.35M) and has 3 different internal depths of 1.2, 1.35 and 1.5M. Unlike many other swimspas or pools the Atlantic is made using a two pack gelcoat fibre reinforced resin system. This makes it an ideal alternative to a regular swimming pool. The Atlantic Pool is available as a regular pool with no swim jets or with one of our 3 different performance power settings making this our largest swim trainer fitness pool. It is also available as an in ground version.

Atlantic *Pool*

- 1 x 2hp (1.5kW) Single Speed Pump
- 6kW Heater
- 2 Circulating Jets
- From 35 Amp Supply
- Ozone
- 200sq ft Filtration

Atlantic *Classie*

- 1 x 2.5hp (1.9kW) 2 Speed Pump
- 1 x 3hp (2.2kW) Boost Pump
- 6kW Heater
- 2 River Swim Jets
- 30 Hydrotherapy Jets
- From 28 Amp Supply
- Ozone
- 200sq ft Filtration

Atlantic *Classie XP*

- 1 x 2.5hp (1.9kW) 2 Speed Pump
- 2 x 3hp (2.2kW) Boost Pumps
- 6kW Heater
- 2 River Swim Jets
- 30 Hydrotherapy Jets
- From 36 Amp Supply
- Ozone
- 200sq ft Filtration

Atlantic *Aquadynamic*

- 1 x 2.5hp (1.9kW) 2 Speed Pump
- 3 x 3hp (2.2kW) Boost Pumps
- 6kW Heater
- 3 River Swim Jets
- 30 Hydrotherapy Jets
- Auxiliary Control Panel
- From 48 Amp Supply
- Ozone
- 200sq ft Filtration

Standard Features

- 6350 x 2286 x 1580mm
- 2 Exercise Bars
- 12 LED Crystal Water Features
- 8 LED Underwater Side lights
- 3 LED Step Lights
- LED Illuminated Controls
- Exercise Equipment
- Tiled Waterline
- Tiled Swim Lane
- Tiled Step Edge
- Thermo-Pane Insulation with Radiant Guard
- 4 Piece Deluxe Safety/Insulation Cover

- Chemical Starter Kit
- Water Capacity - 13,000 ltrs
- Weight from 2000 kg
- Bluetooth™ Audio with Speakers and Subwoofer

Optional Upgrades

- Pro Swim
- Balboa™ Wi-Fi Upgrade
- Auxiliary Heater Controller (installed)
- Titanium LPHW Heat Exchanger, inc AHC (installed)
- 3kW Slave Heater

All stated power requirements are based on a minimum supply with the swimspa running in **ECO** power setting. **We cut power not performance.** All dimensions and capacities are subject to change.

Options

LED Topside Controls

LED lights are installed into the air controllers, diverters and waterfall controls. This subtle lighting looks stunning at night and has multiple colour choice sequences.

LED Cascade Overflow Waterfall

This stunning feature consists of 2 x 460mm cascade waterfalls located at the river jet end. They feature LED lighting to make a stunning night time display.

LED Crystal Fountains

This attractive water feature produces a wonderful water fountain display and sets a perfect scene for night time bathing or garden parties. With LED lights fitted the fountain columns of water change colour.

LED Jets

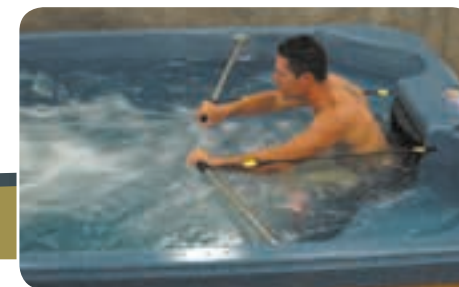

Jets are fitted with LED back lighting and as with all of the LED light upgrades there is a multiple colour choice and sequence selection. This adds to the night time bathing experience.

Exercise Equipment

This multipurpose exercise system turns the Catalina Swimspa into a home gym and offers the bather a wide variety of upper body and swimming work outs. It includes;

- A swimming belt that allows a swimmer to resistance swim at a pace they feel comfortable with.
- A jogging belt that is worn by the bather to keep them central and to aid jogging against the flow of water

- Curls - Bicep workout regime that allows the bather to exercise the upper arm in the comforting and soothing surroundings of warm water. By adjusting the position the bather can tailor the intensity to their own strength abilities.

- Rowing exercise - Each of the Swimspa models has a rowing seat position with foot massage feature. The rowing attachment connects to this seat position and allows the bather to do upper body exercise with adjustable resistance using both push and pull technique

Pro- Swim System

This incredible swimming and coaching aid has several unique features to aid all swimming abilities from the learner swimmer to the serious aquatic athlete.

- For the learner or less confident swimmer - Allows the swimmer to maintain a high body position while working against resistance at maximum effort. The Pro-Swim forces efficiency while increasing strength and confidence.
- For the confident swimmer - Ideal for freestyle, breaststroke and backstroke.

For breaststroke the Pro - Swim helps adjust and correct pull and kick separately as well as the entire stroke. Again, ideal for backstroke because of the steady head position.

- For the endurance swimmer, professional or swimming trainer - It allows swimming for sustained long time periods without the need to keep turning! It is perfect to work on stroke correction, such as still head position and shoulder roll. Enables a coach to make stroke corrections while the swimmer is stationary. Speed change is easy to moderate, concentrating on finishing strokes and stretching out on hand entry.

Features and options explained. . .

LED Speaker

Valved Bypass

All Catalina Swimspas are manufactured with a pre plumbed valved bypass to enable the installation of a heat pump or any auxiliary heat source.

LPHW Heat Exchanger

To enable the use of an external heat source we will pre install a LPHW heat exchanger made of hi-grade stainless steel with titanium tubes.

Wi-Fi Remote App

This App allows the client to control the Swimspas from their Apple® or Android™ device anywhere that you can connect to your local Wi-Fi network, or anywhere there is an

internet connection to your smart device via 3G or 4G. The App lets you start the tub and change settings from your smartphone or tablet. On dual temperature models it can only be fitted to the pool or spa.

Change Over Switch

The switch system allows the client to easily switch their Swimspa from the inbuilt heater to an auxiliary heat source.

Light Commercial Upgrade

An increasing amount of Catalina models are being installed in clinics, hospitals, rehabilitation units and special therapy centres that require an upgraded filtration system or automatic chemical control.

Bluetooth Audio with Powered Subwoofer

This Catalina music upgrade allows the client to wirelessly stream music from their portable music device, phone or tablet, in fact anything that has Bluetooth capability. The subwoofer

gives incredible depth to any music being played. The speaker picks up the low pitch audio frequency sound to give that extra bass. It not only provides an improved sound at low volume it will give extra rhythm for that 'occasional' party!

Gas or Oil Heating

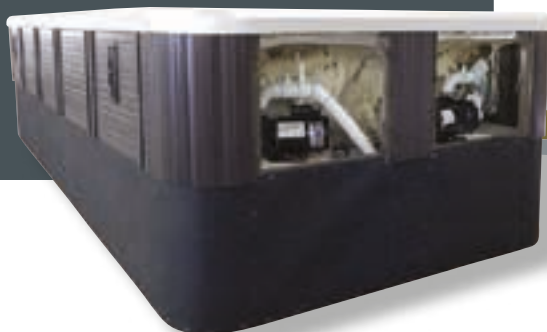

We offer a range of Oil or Gas (natural or propane) boilers.

In-Ground

All standard models can be installed either partially or full in-ground but a service pit must be constructed the full depth of the model to allow access to the equipment.

Many of models are available as 'In-Ground' these are purpose made with the bottom 610mm of the cabinet removed and replaced

with durable polyethylene and the equipment located higher in the cabinet. Each In-Ground model is between 300mm-610mm longer than its standard counterpart.

Every Catalina Swimspa is hand built to the highest of standards using only the finest materials and components. To enhance the clients purchasing experience and long term satisfaction we offer an unparalleled list of options and upgrades to allow the purchaser to 'design their own' bespoke model.

For more information on our bespoke design service or on any option please call the Catalina technical team.

Environmental statement: As one of the UK's oldest and largest suppliers of hot tubs, swimspas and exercise pools, Catalina Spas Ltd has a responsibility to not only provide our customers with products that are manufactured to the highest technical standards, they must also have a minimal impact on the environment.

The Directors and staff at Catalina Spas Ltd recognise that environmental protection is one of the most important issues facing the world today. Through continuous commitment we remain determined to identify potential for increased efficiency, implement waste minimization, monitor and reduce energy consumption and our consequential emissions of harmful greenhouse gases.

As part of our commitment we operate our own recycling plant at our Salisbury distribution centre and all Catalina spas and swimspas meet the standards set by the California Energy Commission standards who promote efficiency and conservation.

Though every effort has been made to ensure the accuracy of information in this brochure. If you have specific power requirements or dimensions please call for more information.

All swimspas include a cover and chemical starter kit.

The paper used to produce this book was sourced from managed European sustainable forests.
