Harvia Spa Modules

Harvia Spa Modules

Interior elements for spas and steam rooms

Harvia Spa Modules offer an easy and effective way to implement the furnishings and structures of even the most demanding spa destinations. The manufacturing method can also be scaled down effectively for home steam rooms, spas and shower recesses – in almost any form imaginable.

Harvia Spa Modules are

- easy and quick to install
- easy to modify
- lightweight yet strong (with a structural strength comparable to concrete)
- particularly effective at water insulation
- comfortable to use (they warm up/cool down when in contact with the body much faster than concrete structures)
- manufactured from extruded polystyrene (XPS)
- ecological compared to concrete (manufacturing consumes less water and energy)

Ready-made – just add a surface!

Harvia Spa Modules deliveries comprise wall, ceiling and seat structures as ready-to-install modules. After the modules have been installed, they are levelled and waterproofed. All the client has to do is select and purchase tiles and arrange for their installation.

For use in spas, home spas, fitness clubs, wellness centres, hotels...

- steam rooms
- showers
- cold rooms
- poolside benches, swimming pools
- furniture, such as recliners

A magnificent steam room experience from Harvia

- Harvia Spa Modules structures

- aluminium door profiles
- lighting products
- steam fountains

Steam rooms

SMNR2613 Nord

2600 x 1300 mm

Recommended steam generator output 4,5 kW

Nord – for the client who prefers minimalist style. Due to its size Nord is suitable for private houses and apartments. The steam bath and shower fits perfectly in smaller beauty salons and hotel suites due to its ability to accommodate 2–4 persons.

Steam rooms

SMCU2021 Cupola

2000 x 2100 mm

Recommended steam generator output 6,0 kW

Cupola is a dome-style steam bath. The extraordinary shape enables you to enjoy sauna as it was done originally centuries ago in Ancient Greece and Rome. Cupola is suitable for private home spas and public wellness centres and it can fit 4–10 persons (depending on size).

For special orders the technical restrictions of Cupola baths will be given separately for each order. Technical restrictions for standard models:

minimum size: d = 2m, h = 2,2m

maximum size: d = 4m, h = 3m

Steam rooms

SMCB2020 Cubo

2000 x 2000 mm

Recommended steam generator output 6,0 kW

Cubo steam baths – for the client who prefers special solutions and quality. Suitable for use in private and public spas as well as medical centres. The largest Cubo steam baths have 3x3 meters of floor space, are 2,5 meters high and are able to fit 6–14 persons.

Steam rooms

SMTA1717 Tacco

1660 x 1660 mm

Recommended steam generator output 4,5 kW

Tacco steam baths – for the client who prefers special solutions and quality. Suitable for use in private and public spas as well as medical centres. The largest Tacco steam baths have 3x3 meters of floor space, are 2,5 meters high and are able to fit 6–14 persons.
